## FILL SAND

### S P E C S H E E T

Category: Aggregate

---

- ✓ Fill sand is primarily used for backfilling, bedding, and general filling applications.
- ✓ A multipurpose building material
- ✓ Made from finely crushed rocks and particles, such as quartz, granite, limestone, and other minerals.
- ✓ Environmentally Safe
- ✓ Color: Tan

#### Common Uses:

Primarily used for Golf Courses and for horse arenas. However, it is also used for backfilling concrete structures. Fill sand helps create a level surface and allows for compaction, ensuring a reliable foundation.

Fill sand can also be used for drainage around pipes, trenches, and other low-level applications. When used in gardening and landscaping, fill sand can help to raise and level areas while allowing water to flow through.
